

# PLASTICS PROCESSORS IN GREECE

LOCATION AND PRODUCTION DETAILS OF 225 PLASTICS PROCESSING SITES

The image displays two overlapping screenshots of the AMI Database software. The top screenshot shows a list of companies under the 'Injection Moulding' category. The bottom screenshot shows a detailed profile for a company in Ioannina, including contact information, processor type (Custom), polymers (PP), markets (Thinwall Containers for Dairy Packaging, etc.), services (Offset Printing), consumption (5001-7500 tonnes), machinery (Demag, Stork), and comments (Main materials: 100% PP).

### Which information is shown?

- Full addresses and numbers of all manufacturing plants
- Managerial contacts
- Polymers processed
- Markets served/products manufactured
- Machinery information

Make sure you have the latest information on all the players in the industry

### Which processors are included?

- Injection moulders
- Blow moulders
- Rotational moulders
- PE film extruders
- Sheet extruders
- Cable extruders
- Pipe extruders
- Profile extruders
- Tube and hose extruders
- Compounders and masterbatch producers

Gold database:  
£375/ €450/\$585

## What's in the Database?

Applied Market Information Ltd. are leading market researchers and analysts of the plastics industry. AMI's guides provide you with accurate, up-to-date and comprehensive data you can trust. In this database you will find:

- **Company information and contacts.** An alphabetical list shows the full address, telephone and fax numbers, company emails and website of all companies as well as the details of the corporate ownership. The database gives up to 4 managerial contacts per site including the technical manager.
- **Production information** The production information for each process at each site is clearly shown, the processes covered are: Blow moulding, cable extrusion, compounding and masterbatch production, injection moulding, PE film extrusion, pipe extrusion, profile extrusion, rotational moulding, sheet extrusion and tube & hose extrusion.

The production information includes:

- The polymers processed and total polymer throughput
- The markets served and products manufactured
- The services offered
- Some machinery information

- Additional information on the company's specialisations showing the main polymers they process and the main markets they serve.

### Electronic version

The data for each site has been compiled in a Microsoft Access database and is typically supplied on CD or as a download. The gold database shows extra contacts and some comments on the company's specialisations.

The database enables you to search, select, print records and also export the addresses and contacts details to an Excel spreadsheet to make your marketing effortless.

The data can be used in most PC environments. AMI databases run under Access 2000, 2003, 2007 and 2012 (32bit). The prices quoted are for a single user licence which permits the purchaser to install the database on one PC and an associated laptop. Extra licences are available for multiple installations at £60 / €75 / \$95.
